Vapormatic have now introduced the main cab filters for the popular John Deere 6000 series tractors.
VPM8052

Blocked cab filters **severely** impair the effectiveness of the air conditioning system due to the lack of air flowing through the evaporator which is located under the seat. Blowing these filters through or banging them out only brings them slightly back to life as the small particles remain trapped in the element.

Many Deere owners will also recognise that these filters are prone to rotting out due to water lying in the housing, to prevent this it is good practise to periodically pull the round sprung loaded bung downwards located on the bottom of the housing to release the build up of dirt and condensation.

Rotted paper and foreign material can flow through to the evaporator under the seat and block the airflow into the cab.

These are two mechanical reasons to change these filters without looking at the comfort aspect of the operator. Clean filters mean a dust free, odour free environment for the cab and a more productive operator.

Our VPM8052 John Deere cab filters are direct replacements for all **6000, 6010, 6020, 6030, 7430 and 7530** tractors. Simply unscrew or unclip the cover depending on which model you have, pull the filter out and slide the new one in. it's that simple. Please note, these are **not** pollen filters.

This filter can also be used for SE applications where the filter is located in the roof. Just unscrew the two thumb screws and pull the filter unit downwards to expose the filter. If you are servicing an SE, don't forget to clean the recirculation filter in the housing you have just removed.

Keep your John Deere machine in top order and fit replacement Vapormatic cab filters today!

Please browse our online John Deere catalogue for other filters and service items.

VPM8052 applications;

Premium applications (2 required located on the rear of cab)

6100, 6200, 6300, 6400, 6506, 6600, 6800, 6900
6110, 6210, 6310, 6410, 6510, 6610, 6810, 6910
6120, 6220, 6320, 6420, 6520, 6620, 6820, 6920
6230, 6330, 6430, 6530, 6630, 6830, 6930
7430, 7530

SE applications (1 required located in roof in front of sun roof)

6100SE, 6200SE, 6300SE, 6400SE
6110SE, 6210SE, 6310SE, 6410SE, 6510SE, 6610SE
6120SE, 6220SE, 6320SE, 6420SE, 6520SE, 6620SE
6130, 6230, 6330, 6430, 6530, 6630, 6830, 6930
