New multi brand diagnostics for tractors – VLC5900

Introduction:

Vapormatic has just launched a new multi brand diagnostic tool for agricultural tractors, combines and forage harvesters.

Teaming up with TEXA, the world leading company for multi-brand diagnostics, Vapormatic has a product that has been tried and tested on cars, trucks, bikes and more recently marine applications.

Recognising the Demand:

The nature of tractor repair has changed. In today's agricultural engineering market, fault diagnosis is as much an electronic evaluation as it is a mechanical inspection. Increasingly, without specialist diagnostic equipment, many tractors and agricultural machinery can not be serviced or repaired.

Satisfying the Need:

Vapormatic's diagnostics equipment will support your business and market development opportunities. It will enable your service technicians to offer a comprehensive All Makes service and fault diagnosis to your customers who operate multi-brand machines.

Product Features and Capabilities:

Each workshop is now able to access different vehicle manufacturer's electronic systems, with a single device, and carry out diagnostics on tractor electronic systems, using the innovative **NAVIGATOR TXT** and the new **IDC3 Agri** dedicated software.

- Connects directly to the diagnostic socket within the vehicle
- Communicates wirelessly to any Windows PC via *Bluetooth*
- Easy to use software
- Allows access to the following controllers
 - Engine management
 - Transmission
 - Suspended front axle
 - Electronic rear hydraulics
 - Electronic front hydraulics
 - Rear PTO
 - Front PTO
 - Body on board computer
 - Air conditioning
- Includes electrical wiring diagrams, system and device descriptions and technical bulletins
- Comes with a series of specific diagnostic cables, these include, Case International, Claas, Deutz, Fendt, John Deere, Landini, McCormick, New Holland, Same & Steyr
- Supplied in a protective carry case
