New Vapormatic Hydraulics Catalogue

Vapormatic is pleased to announce the launch of our much awaited **Hydraulics range catalogue PBA0600**. For the first time in the companies' history we have produced a single catalogue containing all the elements of our extensive hydraulics range including hose, fittings, adaptors, couplings, valves and valve controls systems.

This important range is depicted in full colour and is formatted in a number of different ways to ensure ease of use, for example, we now show all the fittings suitable for a specific hose size on two pages allowing the user to quickly reference the hose size, dimensions, swage details and the fittings required to make up a hose assembly.

Identification of each thread and fitting type is another extremely useful feature, allowing those less used to this potentially complicated product group, to approach a hydraulics job with confidence. In addition to the size grouping and in a very similar layout to our much praised PTO catalogue, a section showing components by product group is another useful feature, allowing users to identify requirements more efficiently. Range developments in hose and fittings include ORB flat face, metric, BSP, JIC range infill's, 5/16 hose inserts and ferrules, pressure washer hose swaged inserts and an updated range of swaging machines.

The new Hydraulics catalogue also features our extensive range of quality monobloc and slice valves, controls and fittings. This section is packed with fitting dimensions, circuit and flow diagrams and technical details, allowing the user access to all the information required to identify and build complete hydraulic systems or replace existing components.

Containing more than 300 pages and over 150 new parts, this easy to use, full colour catalogue, provides customers with a publication that includes technical and dimensional information that will help to ensure that the correct hydraulic parts selection is achieved.

Vapormatic quality replacement parts carry a full **12 months parts and labour warranty**, which, whilst subject to normal conditions of use, correct application and fitting, remains unique in the industry.

This major benefit enables the Customer to **Buy and use Vapormatic parts with confidence**.

You can order copies of this catalogue, reference **PBA0600**, by contacting the telesales team on Tel: +44 (0)1392 684000 by fax +44 (0)1392 217511 or Email enquiries@vapormatic.com for further details.

Vapormatic – The Genuine Alternative.

Original equipment manufacturers names and part number are quoted for reference purposes only and are not intended to infer that our replacement parts are used as original equipment.
