Bulk Tank Locking Cap (Part No. VLA3056)

Prevent unwanted access to your bulk storage tank. Secure it with a bulk tank locking cap (Part No. VLA3056)

- Patented design
- Does not require a padlock
- Eliminates "crow-bar" access
- Rubber gasket seal to prevent leaks
- High security numbered lock with over 50,000 combinations
- Complete with 3 keys
- Integrated safety thermal relief
- Ideal for use on bulk fuel or water tanks

Patented technology that will fit to any standard 2" fill point inlet on a fuel tank.

When locked, the cap will spin freely and is almost **impossible** to remove.

Most existing locking caps are supplied in two pieces and are often secured in place using low quality padlocks which can easily be removed or broken.

This lock eliminates this problem with its one piece padlock free design and as a result there are **NO** torque points for forced entry using crow bars etc. ensuring your tank contents are as safe and secure as possible.

All Vapormatic quality replacement parts carry an industry leading **12 month parts and labour warranty**. For further information on specific items please visit www.vapormatic.com
